Bachelor of Business Administration (BBA) — Accounting

Sheridan knows which technical and essential skills employers are looking for — from creative problem-solving to collaboration to critical thinking — and makes a point of embedding those skills into each of its purposeful programs. Our students are collaborative, creative problem-solvers who enter their co-op work terms ready to hit the ground running and make an observable positive difference in the workplaces they join.

Flexible Work Term Scheduling
January, September and May work term starts 4, 8, 12 or 16 month consecutive co-op work terms.

Meet our BBA Accounting Students
The BBA Accounting program is designed to respond to the changing business world. Our students are ready to perform tasks such as writing, researching, presenting, analysing and learning. They may find careers in forensic accounting, financial analysis, business valuation, performance management, auditing, tax management, managerial accounting, financial reporting or many others.

Sheridan’s Honours BBA (Accounting) degree meets the Chartered Professional Accountants of Canada’s (CPA) degree requirement for entry into the CPA Professional Education Program (PEP).

Graduates of Sheridan’s Honours BBA (Accounting) program that meet all of the CPA’s minimum grade requirements qualify for exemption from the CPA Preparatory courses.

In addition, having met CPA’s minimum grade requirements, Sheridan’s Honours BBA (Accounting) graduates will also have completed all prerequisite entry courses along with the six technical courses required for entry into CPA Canada’s Advanced Certificate in Accounting and Finance (ACAF).

For more information on these professional accounting programs offered by CPA visit www.gocpaontario.ca.

Sheridan BBA Undergraduate Competencies
• Critical Thinking and Problem Solving
• Accessing and Analysing Information
• Collaboration Across Networks and Leading by Example
• Effective Oral and Written Communication
• Curiosity and Imagination
• Agility and Adaptability
• Initiative and Entrepreneurship

Authentic experiential learning and industry-expert faculty lead students to:
• Become action-oriented problem solvers.
• Use creative, critical and reflective thinking to address organizational opportunities and challenges.
• Perform robust research through the application of accepted applied research methodologies.
• Evaluate complex qualitative and quantitative data to support strategic and operational decisions.
• Apply problem solving and decision making frameworks that propose defensible solutions to organizational opportunities, changes and risks.
• Build effective internal and external relationships using influencing, communication and consultative skills.
• Develop a Creative Learning Portfolio capturing their reflective process, competencies development, and goal-setting.
Practical skills and professionalism start from the beginning. BBA students first complete courses across all business functions before their first co-op work term.

Building on their work accomplishments and career specific courses, BBA students stay nimble as they prepare for their senior co-op work terms/internship and full entry into their profession. BBA students are required to complete two of the four courses indicated.

After 1000/2000-level courses, students are keen to apply their learning in the workplace.

After 3000-level courses students are passionate and ready to apply their higher-level learning to more complex problems and workplace situations.

BBA students are required to complete five Business Elective Courses.

Our students are gutsy, smart, curious and inspired. They curate their career passion through individualized course selections.
